

Renewable energy production chart:

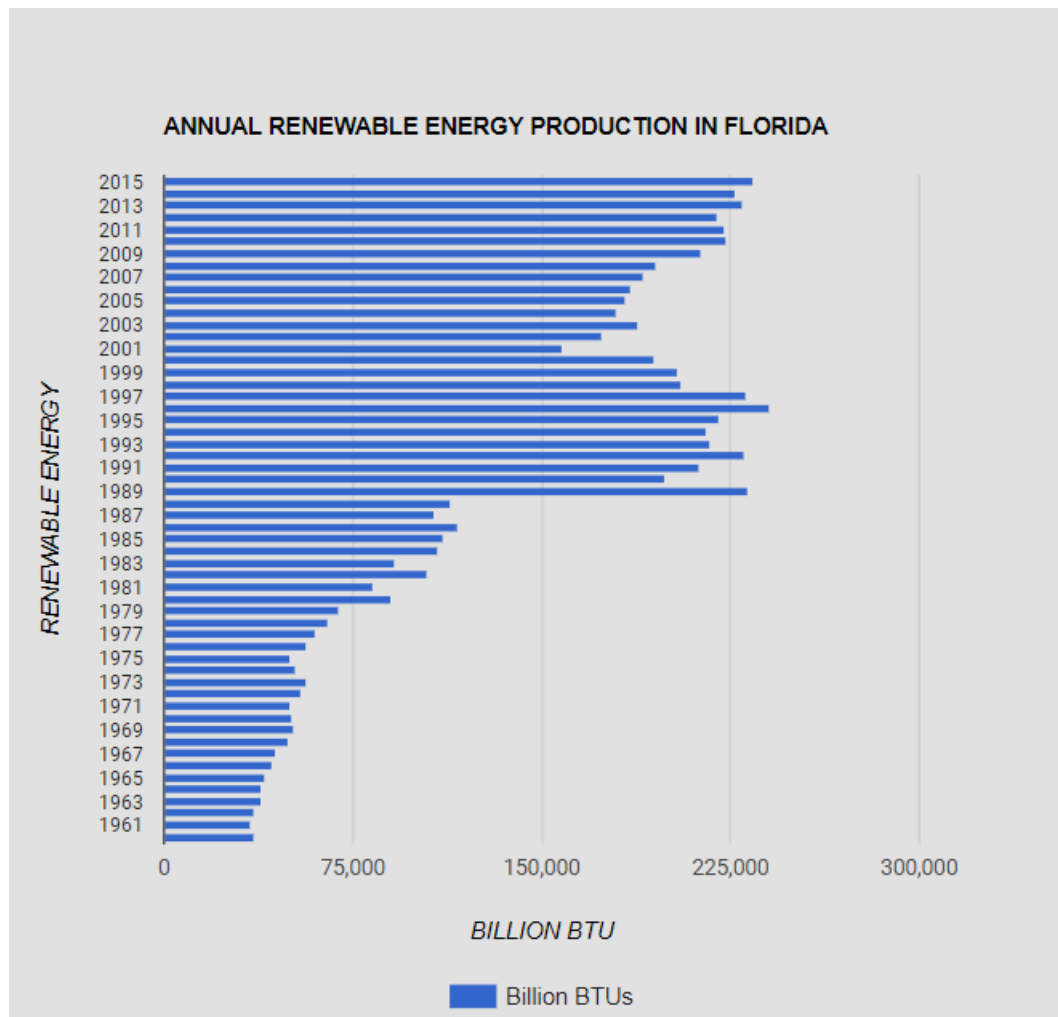

Chart type: Bar Chart

Bar charts was ideal to display this data given the data spanned over a long period and it was ideal to show data trends as it rises or falls very nicely.

API Documentation:

Electricity consumption in Florida:

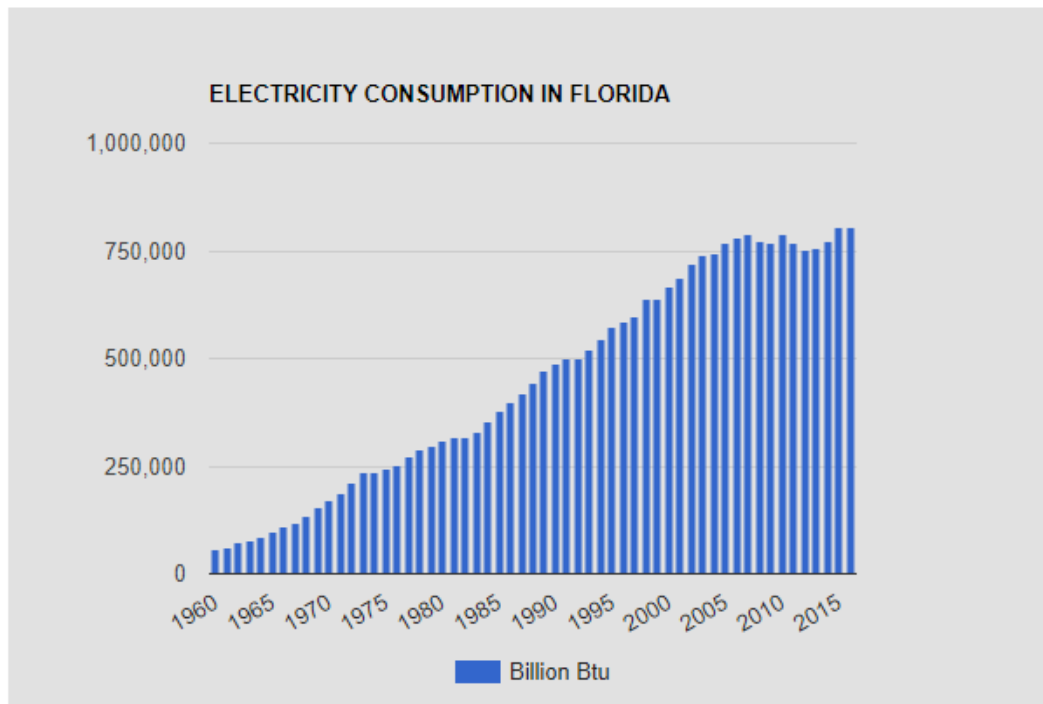

Chart Type: Column Chart

Column charts makes comparisons between different variables very easy to see. And, similar to the last chart, this data also spanned a longer period and the horizontal and vertical bar charts display trends in a way making it very easy to consume at a glance.
